Project identifies demands and potential in indigenous communities in the Northern Amazon

In western Pará, the Energia Limpa, Vida Sustentável Project has entered a new phase. Selected by the Amazon +10 initiative, this innovative project recently conducted a mapping of energy demands in 12 indigenous communities along the Mapuera River in the Northern Amazon, with the aim of identifying needs for photovoltaic solar energy generation.

Unicamp establishes partnership with Enel to research extreme climate events

On July 15, in Brasília, Unicamp's rector, Professor Antonio José de Almeida Meirelles, Enel's global CEO, Flavio Cattaneo, and Enel Brazil's CEO, Antonio Scala, signed a cooperation agreement covering various areas of the energy sector. The agreement includes research aimed at accelerating the transition to renewable energy sources and enhancing the predictability of extreme climate events.

Unicamp hosts the 7th Fapesp Conference on Global Climate Change

The Fapesp Program Workshop on Global Climate Change Research was held at the auditorium of the Institute of Geosciences (IG), at Unicamp, on August 27 and 28. Marking its 16th anniversary, as noted by Paulo Artaxo, professor at the Institute of Physics at the University of São Paulo (IF-USP), the event brought together experts for an enriching discussion on climate emergency, sustainability, and energy transition. The workshop showcased the results of funded research and addressed future challenges in combating global climate change.
